Unifaun Online

Before, during and after delivery.

Unifaun Online.

Unifaun Online is a comprehensive, efficient and secure Internet-based system that processes all your carriers in one and the same system.

- Unifaun Online prints labels, freight notes, customs documents, shipment lists, reports, etc. and automatically sends EDI to the carriers.
- You only pay per print-out, which means that there are no start-up fees, installation costs or support charges.
- An unlimited number of users from various parts of the company always have access to an updated and reliable system.

Small and medium-sized companies looking to improve the efficiency of their transport operations usually choose Unifaun Online Standard. Larger companies with complex transport flows can achieve complete control of their transport operations with Unifaun Online Plus.

We also supply a variety of add-on functions to provide you with an even more powerful system – such as integration to your business system through Unifaun ERPConnect. It is simple to get started, simple to use – and hard to do without.

Unifaun Online Standard.

To help you quickly and easily manage your everyday shipments, we have created Unifaun Online with a number of basic functions. You can easily customize the system by adding your own favourite settings, called print favourites and search favourites.

Our print facility of course considers different transport services' requirements. You are also able to batch print jobs and you can store print jobs to be able to change them at a later stage, before printing.

Unifaun Online is both language and region neutral, which means that the average user can switch between languages, and using the correct settings and date formats, work across borders in real time.

Unifaun Online can create several types of reports with different presentation options. There is also a complete shipment history with extensive search capabilities and status indication for certain types of events.

Functionality - Unifaun Online Standard.

- Labels, freight notes, customs documents, shipment lists, reports, etc.
- Automatic EDI transfer to the carriers in accordance with their requirements
- Standard printouts for various carriers and their services
- Printing favourites and search favourites
- Guest login for selected partners
- Senders outside Sweden
- Import of addresses, receivers and senders
- Pickup request
- Batch printing and bulk dispatches
- Possibility to store print-outs
- Straightforward history with numerous search options
- Carrier specific shipment lists
- General reports
- Status indication for specific events
- Languages – primarily Swedish, English and Finnish
- Cross-border use
(Some functionality applies only to certain carriers.)

Unifaun Online

Unifaun Online Plus.

Unifaun Online Plus makes it even easier to control and manage the administration of your shipments and shipping documents.

Unifaun Online Plus includes profile management, which is a powerful means for large, complex organizations, e.g. different departments in a company or multiple chain stores. With the extensive profile management function, rights and roles of users are administered which makes it easy to control who has access to what the system.

Unifaun Online e-mail notification is a great support for the customer service department since customers can track their shipments themselves.

With Unifaun Online Plus you can also get access to Unifaun Track & Trace. If integrated with your ERP system you can search items directly from the ERP system, with its own order number as the only search parameter.

Furthermore, with the Plus version you easily export information, such as shipment history and address registers, for further storage.

Functionality - Unifaun Online Plus.

- All functions in Unifaun Online Standard
- Profile Management
- E-mail notification
- Export of information for storage and follow-up - Microsoft Excel and tab separated text
- Price Enquiry
- Unifaun Track&Trace
- Extended limit of recipients to 30 000
(Some functionality applies only to certain carriers.)

Unifaun ERPConnect.

Unifaun ERPConnect reduces the risk of errors since you no longer have to perform maintenance on customer registers in multiple systems. It also gives you access to a simpler dispatch processing, which can save you a great deal of time.

Unifaun ERPConnect makes it possible for the online system to receive information from the business system, and then reuse information about receivers, order numbers, services, etc. You can also print transport documents and send EDI directly from the business system.

One condition is that the system is capable of generating information text files in one of the following formats: XML, Pacsoft format, tab delimited text or – using the Unifaun FileConverter – any interpretable text file.

Unifaun ERPConnect supports integration with all business systems, although the level of adaptation required may vary.

Unifaun Online Control and EDI transfer.

Unifaun Online Control allows you to track your shipments and supervise the EDI transfer if you create shipping documents in another system, e.g. Unifaun PrintServer.

Unifaun Online Control also helps you produce shipping lists, check lists and various reports, or if preferred, lets you benefit from the data export functionality. Customized period reports or summaries are available for current delivery via e-mail or HTTP/XML.

Together with Unifaun PrintServer you have a powerful tool for all aspects of your transport administration.

Support.

Your agreement with Unifaun includes support and maintenance of Unifaun Online. If you need help there are several options.

Documentation.

Go to Unifaun Online's help pages for user guides, specifications, downloads, sample files, etc.

Questions and Answers.

Check whether your question has already been answered in our forum. In the forum, you can discuss and find answers to questions about all aspects of Unifaun products, carriers, labels, domestic and CMR freight notes, printers, customs documents and other transport and carrier issues.

Unifaun Support.

Unifaun also offers personal support from our support team working closely with product development, account managers and our partners. In most cases we solve the problem directly in touch with you. Disturbances in central server functions are handled immediately, day or night. Serious functionality problems are sought and acted upon the same day and minor errors are corrected as soon as possible daytime.

Let us show you how it works!
